

Ade Olumide for Mayor Competence & Ethics

Work with Canada and Ontario until Ottawa achieves:

- a) 3P – learn from Edmonton and end the environmental harm from landfill methane emissions through One Biofuels Zero Waste Recycling Centre for weekly collection of organics, construction & demolition, electric & electronic waste recycling, landfill gas recovery, blue and black bin materials recovery, waste-to-biofuels).
- b) Existing waste service providers may bid on renegotiated contracts and the implementation of one Energy From Waste Centre or smaller scalable facilities, based on partnership with a company that has a technology that has already passed environmental standards assessment in a similar city.
- c) Implement Canada Bill of Rights s1(a) “enjoyment of property”, Municipal Act s10(2)(6) “health, safety and well-being”, s128(1) “public nuisance”, s447.1(b)(iv) “property values” bylaw to complement provincially regulated commercial wind turbines re loss of birds, farmlands, set back to mitigate the effects of the harmonics on health, enjoyment of property, soil disturbance impact on well water.
- d) Advocacy re environmental benefits of hydro from water through a Canada hydro free trade agreement.
